GULF COAST VASCULAR SURGERY ASSOCIATES

2200 Bayshore Blvd, Suite 310 | Tampa, FL 33606 | (813) 555-0140 | NPI: 1987654321

PATIENT MEDICAL CHART — CONFIDENTIAL — FOR AUTHORIZED USE ONLY

1. PATIENT DEMOGRAPHICS

Patient Name	Linda Park
Date of Birth	November 30, 1962
MRN	GCV-011203
Age	62 years
Sex	Female
Address	5 Cypress Point Ct, Brandon, FL 33511
Primary Care Physician	Dr. Henry Kwon, MD

2. INSURANCE & COVERAGE

Primary Insurance

Payer	Florida Blue (Blue Cross and Blue Shield of Florida)
Plan Type	PPO — BlueOptions
Member ID	FLB309118465
Group Number	FL-55120-OPT
Coverage Effective	January 1, 2025
Prior Auth Required	Yes — Vein procedures
Auth Contact	1-800-555-0199

Secondary Insurance

None on file.

3. ACTIVE PROBLEM LIST

ICD-10	Diagnosis	Onset	Status
I83.812	Varicose veins of left lower extremity with pain	2025	Active
I87.2	Venous insufficiency (chronic) (peripheral)	2025	Active
I10	Essential hypertension	2010	Active

4. CURRENT MEDICATIONS

Medication	Dose	Frequency	Indication
Amlodipine	5 mg	Daily	Hypertension
Acetaminophen	500 mg	PRN	Leg pain

5. ALLERGIES & ADVERSE REACTIONS

No known drug allergies.

6. VISIT NOTES — VASCULAR SURGERY

Visit Date: September 9, 2025 | Attending: Dr. Elena Vasquez, MD, FACS | Type: New Patient Consult

Chief Complaint:

Left leg swelling and aching, several months.

History of Present Illness:

62-year-old female with left lower extremity aching, heaviness and evening ankle swelling for approximately 8 months. Worse with standing, better with elevation. Occasional night cramps. Denies ulceration, bleeding, or thrombophlebitis. No history of DVT. Her PCP recommended compression stockings earlier this year; patient reports she 'has been wearing them' but is unsure of the strength and does not remember exactly when she started.

Physical Examination:

Left leg: varicosities medial calf, largest approx. 4 mm. 2+ pitting edema to mid-calf. No skin changes, no ulcer. Pulses 2+. Right leg: normal.

Assessment & Plan:

Symptomatic varicose veins, left leg, with edema: CEAP C3. Order venous reflux duplex. Continue compression stockings; advised 20–30 mmHg. Return after duplex.

Electronically signed: Dr. Elena Vasquez, MD, FACS — September 9, 2025

Visit Date: September 30, 2025 | Attending: Dr. Elena Vasquez, MD, FACS | Type: Follow-Up

Interval History:

Duplex reviewed, below. Symptoms persist: aching and heaviness most days, ankle swelling by evening. Patient reports she is 'still wearing the stockings'. Symptoms make it hard to finish her usual errands and she has stopped her weekly bowling league.

Assessment & Plan:

Left GSV reflux, CEAP C3, symptomatic. Recommend endovenous laser ablation of the left GSV. Submit prior authorization.

Electronically signed: Dr. Elena Vasquez, MD, FACS — September 30, 2025

7. DIAGNOSTIC IMAGING & TESTING REPORTS

Lower Extremity Venous Reflux Duplex Ultrasound — Left — September 23, 2025

Indication	Left leg varicose veins and edema; evaluate reflux
Deep System	No DVT. No deep venous reflux.
Great Saphenous Vein	Incompetent. SFJ reflux 1.6 seconds. GSV diameter 6.4 mm at SFJ, 5.2 mm mid-thigh.
Small Saphenous Vein	Competent.
Perforators	No incompetent perforators.
Tributaries	Dilated medial calf tributaries 3–4 mm.

Interpretation: Left great saphenous vein reflux with axial incompetence. No DVT.

Electronically signed: Dr. Thomas Reed, RVT / Dr. Elena Vasquez, MD — September 23, 2025

8. PLANNED PROCEDURE

Planned Procedure	Endovenous laser ablation, left great saphenous vein
CPT	36478 — Endovenous ablation therapy of incompetent vein, extremity, laser; first vein treated
Laterality	Left
Diagnosis	I83.812, I87.2
Surgeon	Dr. Elena Vasquez, MD, FACS
Payer	Florida Blue PPO
PA Status	Pending

Clinical Indication Summary:

• Left GSV reflux 1.6 s on duplex 09/23/2025.

• CEAP C3 with edema; varicosities approx. 4 mm.

• Symptomatic despite compression stockings.

• Symptoms limit daily activities.
